

QUESTIONNAIRE - AQUARISTIK

OLOID - Agitate, Circulate, Aerate

Use of wave formation, transformation, flow and ventilation for basin volume of 5-5000 m³!

To quickly clarify whether these energy-saving technology is suitable for your pond, your basin or your aquarium, please completed this questionnaire far as possible and sent to us via e-mail.

Questionnaire

1. General information

1.1 Operation

- Salt water
Type of simulated habitat: (e.g. Red Sea)

.....

- Fresh water
Type of simulated habitat:

.....

1.2 Water parameter

- Temperature: °C
- pH-value:
- Salinity: g/l
- Circulators
Number and performance of pumps: basin geometry and volume

.....

QUESTIONNAIRE - AQUARISTIK

OLOID - Agitate, Circulate, Aerate

2. Basins

(If possible enclose sketch)

Number of basins with the following dimension:qty.

Width of basin:m

Length of basin:m

Diameter of basin:m

Water height: min:m

max:.....m

Basin volume: min:m³

max:.....m³

3. Objective of OLOID use

- Circulation of the entire volume of water and generation of a pulsating flow

Remarks:

.....

- Generation of waves / flow at the surface

so you cannot see through the water surface

in order to.....

Others:

.....
